Multi-Function Belly Pack Transmitter

Care and Handling
Failure to follow care and handling instructions will void the warranty and could result in unsafe equipment operation.

Clean transmitter gently with a damp cloth or dry, compressed air. Do not immerse transmitter in water, or spray with hose. Do not store outside.

Do not drop transmitter or otherwise subject transmitter to physical shock.

Do not expose transmitter to extreme temperatures.

Do not open transmitter enclosure. Transmitter contains no user serviceable parts.

OPERATION
Controls
Transmitters are built-to-suit, and may be equipped with joysticks, potentiometers, paddles, pushbuttons, switches, and other customer-specific controls. Take time to familiarize the operation and arrangement of the controls before operating equipment.

Batteries
This transmitter operates from a pair of standard “D” cell batteries. (Jumbo version requires 3 x “D” cell batteries. Alkaline batteries generally provide longest life. If rechargeable batteries are used, NiMH type are recommended. Batteries are accessible by a cap on the side of the belly pack. No tools are needed to replace batteries. To ensure maximum battery life, be sure to turn the transmitter OFF when not in use. Remove batteries prior to shipping or storing transmitter.

Transmitter/Receiver Matching
Transmitters and receivers are shipped from the factory as matched pairs. If a new transmitter is to be used, it must be trained to operate the receiver.

Training procedure:
Transmitters with tether cables:
1. Connect transmitter to receiver using tether cable provided.
2. Operate transmitter to verify tether is connected.
3. Disconnect tether, and resume normal operation.

Transmitters without tether cables:
1. Power on transmitter and receiver.
2. Press “LEARN” button on receiver.
3. Operate transmitter normally.

IMPORTANT!
Read this manual completely before operating system.

Keep this manual available for future reference.

Make sure the area is safe for operating equipment before turning power on or starting equipment.

If you encounter any problem or malfunction, discontinue use immediately, and contact your equipment dealer for service or replacement parts.

CAUTION
Improper operation of these controls could cause damage to equipment. Do not allow anyone to operate this equipment before completely reading all manuals.

NOTICE
Miratron, Inc. controls are not intended for life or safety applications. Miratron, Inc. shall not accept responsibility for installation, application, or safety of machine or systems which utilize miratron, Inc. controls.

| Range (line of sight) | Standard range = 500 feet  
Extended range = 1500 feet  
International = 500 feet |
| RF Power Output | Standard range = 5mW  
Extended range = 100mW  
International = 60mW (100mW EIRP) |
| Battery Type | 2 “D” size alkaline or rechargeable (Standard model)  
3 “D” size alkaline or rechargeable (Jumbo model) |
| Battery Life (fully charged) | Standard range = Standby, 80 hrs; Transmit, 35 hrs  
Extended range = Standby, 20 hrs; Transmit, 8 hrs  
International = Standby, 15 hrs; Transmit, 6 hrs |
| Controls   | User specified toggles, joysticks, potentiometers, or paddles |
| Led Indicator | Flashing = normal; Double blink = battery low |

#### Enclosure

| Belly Pack | High-impact polystyrene, UL94HB  
Standard: 7-3/4” L x 5-1/4”W x 6-1/2”D  
Jumbo: 11-1/4” L x 5-1/2”W x 6-1/2”D |
| Sealing    | IP65 |

#### Environmental

| Storage | -40ºC to 85ºC |
| Operating | -10ºC to 60ºC |

### Troubleshooting:

<table>
<thead>
<tr>
<th>ISSUE</th>
<th>SOLUTIONS</th>
</tr>
</thead>
</table>
| Transmitter not working. LED not on or blinking. | Install new batteries.  
Make sure power switch is on. |
| Transmitter not working. LED on or blinking. | Make sure E-Stop switch is out (if equipped.)  
Install new batteries.  
Make sure receiver is powered.  
Check receiver fuse.  
Make sure transmitter is in range of receiver.  
Make sure transmitter and receiver are matched. |
| Poor range. | Check receiver antenna and cable for loose connections or damage.  
Install new batteries.  
Obstructions, interference, and adverse weather can affect range. |
| One or more functions do not operate properly. | Verify receiver wiring is correct.  
Verify control device is operational (solenoid valve, pump, etc.)  
Inspect transmitter, receiver, and cabling for damage. (Do not open.)  
Some control systems feature special program logic that can disable functions under certain conditions. Consult factory for specific details. |
